The New Generation of Spot Cleaning Techniques

Art's Ultimate Spot Cleaning

gives you what you want to know about caring for your carpets and rugs.

**Based on the experience and knowledge
of a certified carpet cleaning specialist, it tells you:**

- How to make cleaning up spots on your carpets as easy and effective as possible.
- How to put together your own spot cleaning kit of common household items and safe, non-problematic chemicals you already use for other purposes.
- The one tool that can make your spot cleaning easier and more effective than ever.
- Specific, easy to understand, easy to do instructions for treating hundreds of different spots, stains and discolorations.
- In "Tips From The Tradesman", Art shares information that is often available only to the professional.
- A comparison of the different type of carpet fibers to help you choose wisely the next time you buy carpet.
- How often your carpets should be cleaned - based on the type and amount of traffic your carpet receives and environmental factors.
- Pros and cons of the different carpet cleaning methods, including do-it-yourself.
- Routine maintenance that prolongs the life and good appearance of your carpet.
- The truth about whether you really need that carpet protector, you're often pressured to buy.
- How to find a real carpet cleaning professional - not just someone in the business.

Arthur D. Colo'n has been studying the chemistry of carpet cleaning and has preformed countless hands on removal of common, and not so common, household spills and disasters since 1987. His company in Texas specializes in cleaning and restoration work on carpets, rugs and upholstery in homes, businesses, airplanes, boats, cars, recreational vehicles and wherever there is carpet to be found. Why not let Art show you how to clean up your spots the way a true professional does.
